EUSR Pieter Feith: Stabilization and Association Process is the guiding process for Kosovo's European integration as part of the broader region

At the opening of the 15th plenary meeting of the Stabilization and Association Process Tracking Mechanism (STM), chaired by the European Commission in Pristina today, the European Union Special Representative (EUSR) Pieter Feith made the following statements:

EU Special Representative Pieter Feith:

"The Stabilization and Association Process provides the framework for a far reaching relationship between Kosovo and the EU. I am looking forward to further progress being achieved by Kosovo in the coming years, in the areas of good governance, the rule of law, economic and fiscal reform as well as the protection of minority rights."

"While we are moving through politically eventful times, the Kosovo authorities have to continue to work on reforms to further progress on Kosovo's European path as part of the region. We, on the EU side, will continue to provide you with our full support."
